Will Grade Chin Coulee.

40-Mile Will Seek Government Assistance.

Proceedings of the Council of Rural Municipality of Forty-Mile. Councillors present—Walker, Halvorson, Neil, Hanna.

Minutes of previous meeting were read and approved. Councillor Hanna was re-appointed deputy reeve.

The following bills for work done grading the main road into Bow Island were allowed on taxes:

Frank Ream 7.39

G. W. Johnston 30.60

Lou Roberts 22.30

A. C. Gage 18.75

J. R. Fortune 13.00

T. A. Marine 15.00

The following were also allowed:

Blaine Drug & Book Co. 0.80

Western Municipal News 2.50

W. A. Stamer, plowing stone 3.40

Joe Dierhart, cutting weeds 1.50

S. A. D. Jordan, weed inspector 22.50

A. J. Halvorson, meetings, etc. 10.00

T. H. Walker 0.80

Jas. Neil 16.70

S. M. Hanna 27.50

The requisitions for school levies were read and the rates struck.

The tenders for road work were opened and the following contracts awarded:

Grade between 19 and 20 5-11, to W. A. Stamer, at 15c a yard.

Grade between 20 and 39 5-11, to A. Wolf, at 15c a yard.

Picking stone and re-filling holes between seas 7 and 18 5-11, to Joe Fischer for \$10.

Grade between 7 and 18 5-12, to John Ell for \$80.

Grade between 19 and 20 5-12, to W. A. Stamer, at 15c a yard.

Grade between 20 and 39 5-12, to A. Wolf, at 15c a yard.

Picking stone and re-filling holes between seas 7 and 18 5-12, to Joe Fischer for \$10.

Grade between 7 and 18 5-12, to John Ell for \$80.

Germans Checked.

London, July 29th.—The Austro German enveloping movement on Warsaw has been brought virtually to a standstill. The impetus of the drive that carried Field Marshal Von Hindenburg almost to the gates of the city and Field Marshal Von Mackensen to within rifle shot of the Lublin Cholm railway has exhausted itself against the enormous reserves which

Grand Duke Nikolai has hurried to the weak points of the battle line. While the offensive has been checked, military observers believe it too early to say Warsaw is saved. The last ten days' struggle could not be prolonged indefinitely.

The Russians proved themselves to possess superior stamina and they were aided by excellent defensive positions which wore down the Austro German attacks. It is agreed, however, that the battle is not yet ended.

LATEST BULLETINS.

A New York message states that Charles Becker will be electrocuted to day.

Lloyd George announces that sixteen national munition factories have been established in Britain. After consultation with the French press, through the medium of press agents, it is decided to set up six more.

The White Star liner Arabic sailed from New York Wednesday with a great cargo of war supplies. As a protection from submarines, the steering gear is surrounded with sand bags.

Town Council.

The regular meeting of the Town Council was held on Thursday last, July 23rd. Present—Mayor Robertson, Councillors Brown, Smith, Cotton, Sorenson and Reid.

The following accounts were rendered:

Telephone 23.80

St. Louis Review 10.20

Express65

The accounts were ordered paid if found correct.

Reports from the police, health inspector, and weed inspector were ordered to be filed.

Geo. Hymer, of Victoria, B.C., wrote in regard to what offices the town is making to manufacturers, also as to what kind of a proposition would be most reliable to a manufacturer's agent on the Pacific Coast.

The letter was handed over to the Board of Trade.

The secretary stated that Solicitor Lyons had advised that the gas pipe line to the industrial site could be taken up.

The gas sup't was instructed to take up sufficient of the pipe for his needs in connection with the water proposition.

Mr. Flits of the Dunlop Rubber Co. interviewed the Council relative to fire hose.

The matter of the assessing of part of south-east quarter of sec. 33-46-11, was brought before the Council, and the secretary was asked to see the solicitor with reference thereto.

The meeting then adjourned.

Say, Mr. Farmer! We want your business.

Army Cutworm.**How to Lessen the Danger Next Year.**

(Dr. H. H. Strickland.)

Report of the extreme abundance of "millers" are being received from so many districts that it seems to be advisable for us to draw attention to the fact that these are the adults of the Army cutworm, and to remind farmers of the statements we published in the spring regarding this insect.

These "millers" will be laying within the next three or four weeks, the eggs from which next year's worms will hatch. Each female moth can lay up to 1000 eggs, every one of which, under favorable conditions, will hatch into a worm, and menace next year's crop.

We have found that the chief places selected by the moths for egg laying are summer fallow fields upon which weeds are present, and if we are to have an outbreak next year it is merely certain that such fields will be the centres of infestation.

The best advice we can give, therefore, is "Keep your summer fallow clean—absolutely clean—during the next four or five weeks, and, above all, keep them clear of shrubbery."

Everyone realizes that good farming demands this attention to summer fallow, and everyone realizes also the danger of letting shrubbery increase on their farms, but few realize how directly lack of care in keeping summer fallow affects the abundance of cutworms during the following year. It must be noted that we said "absolutely clean" for this is an important point. Two or three weeds to the rod are sufficient to attract moths for egg-laying. The field must have absolutely no sign of green food for the young worm to feed upon, when the "millers" are selecting good spots to deposit their eggs. Summer fallow is their favorite choice, and a total lack of food alone keeps them from laying their eggs on it.

Many farmers, and others, are inclined to think that this worm is of no danger to crops, because this year epidemic conditions were so favorable, that even in the worst infected districts, little or no seedling was necessary.

Such reasoning is only natural, because it so happens that we have never before had an outbreak of this worm in our province, and have therefore not seen what it can do, and does when seasons are favorable to it, and not to us. This experience has been gained in other provinces where its seriousness is realized, because it has from time to time devastated large areas of promising crops. We feel, therefore, that farmers will be well advised to take precautionary measures against an outbreak on their farms next spring, even though they are inclined to think that far more fuss has been made than the case deserved.

Without the least hesitation we can state that had it not been for the unusual and prolonged spell of wet weather which followed seedling, hundreds of acres would have been stripped, or so seriously thinned, that

the crop would not have paid for the labor expended on it.

This season nearly all farmers who have put out money on hall insurance believe that there is danger of hall. Probably they will not have hall on their farm, in which case they get no returns from that money, but they insure willingly.

Why not also insure against cutworm? The premium is low, and if cutworms are present in your district the payment certain, while if they are not, the money put into the labor of "cleaning up" is a paying investment in itself.

We do not predict a recurrence of army cutworms next year. The winter may be unsuitable to their hibernation, but we do claim that when "millers" are so abundant it is more likely that a hall, and advise, therefore, that you "insure" without delay.

1200 Drowned.

Big Steamer "Eastland" Loaded with Passengers Turns in the Chicago River.

Chicago, July 24—The big steel steamer Eastland, crowded with picknickers, turned turtle in the Chicago river at 1:40 a.m. today. It was reported by the owner that 1200 or 1300 were drowned. The boat had been chartered by the Western Electric Company for a picnic on its annual trip.

At 11 a.m. five hundred bodies had been recovered from the wreck of the steamer Eastland. This statement was made by Dr. T. S. Carter, who examined the bodies. Reports from various places on the river said that more bodies were being taken from the water.

The boat is of steel construction and more than 300 feet long. It is owned by the Chicago & St. Joseph Transportation Company.

Many of the passengers were reported to have jumped from the sinking steamer onto the wharf to which the boat was held, taking on its passengers. Scores, however, were thrown into the river and scrambled to the bottom and side of the boat, clinging there until rescued.

North Clark street bridge was choked with thousands of persons on their way to work when the accident occurred. Friends and relatives of many persons who were going on the excursion lined the bridge railing waiting for the boat to depart.

Captain Charles Carland of the Great Lakes steaming station at the mouth of the river hurried with his crew to the scene and aided in the rescue as did dozens of tugs and other craft.

It is said there were 2,500 persons on the steamer. When the boat started to tip, the officers shouted, "Get off! It is too late." Many passengers continued to roll until the latter which held it to the dock snapped. A moment later, and the survivors of the passengers, the steamer turned over on its side and floated out into the middle of the river. Apparently scores of women and children in the cabin were drowned without being

given a chance to escape. Hundreds of spectators were on the side of the boat, which is above water and were later taken ashore by request. City fireboats, police launches and lifeboats from nearby steamers in the river rushed to the rescue. A hole was cut through the side of the lower deck by life savers and the bodies of six victims, five of whom were women, were soon taken out.

Local & General.

Geo. H. Johnston airted up from Burdett on Tuesday.

Mrs. F. Brophy elopement a party of girls at the river last week.

Miss B. Richardson of Whitefish is visiting with Miss Lucile Fuller.

Mrs. H. Hobson of Ashcroft, B.C., is visiting her sister, Mrs. Geo. F. Ridgedale this week.

Mrs. Rose of Empress, who has been visiting her sister, Mrs. Tyre, for a few days, returned home on Wednesday.

Martin Witezak of the southwest of 16-12-10, is given the usual sixty days from July 23 to show cause why his land should not be cancelled.

The crops are splendid, but remarkable to relate, we are now getting a little too much rain, and a little finer weather would be more acceptable if the crops are to mature.

At 11 a.m. five hundred bodies had been recovered from the wreck of the steamer Eastland. This statement was made by Dr. T. S. Carter, who examined the bodies. Reports from various places on the river said that more bodies were being taken from the water.

The boat is of steel construction and more than 300 feet long. It is owned by the Chicago & St. Joseph Transportation Company.

TOWN AND COUNTRY HELP EACH OTHER

Farms and Industrial Centres are Complementary—Relations of Urban and Rural Populations

(From "World Country Life")
Man cannot live by bread alone, and a Province cannot live by farms alone or a nation by the sole industry of agriculture. Country and town are complementary and independent rather than dependent. One is essential to the other and to the full realization of the other.

The country supplies the town or city with its brown and muscle, with the plough and spade, without which man and industry cannot exist. This is impossible. Most of the leading men in the business and professional life of any urban population were countrybred, and medical experts tell us that the healthiest people in the world are those born in the country. Its normal vitality past the second or third generation without recourse to life in the land. Our foremost statesmen, clergymen, physicians, lawyers, and scientists, our most vigorous captains of industry, our most enterprising miners and railway builders came up from these rural districts which are an everlasting well-spring of urban vitality and manhood.

Recruit For Young People

Just here is a point of consideration. If the farm products rededicate the city to the service of the town or city affords a convenient outlet for this rededication. Young men and women who have been educated in the country, accept this service as a duty, and find material field of effort in the neighboring cities, towns. If such centre is not near at hand family ties and social and environmental needs of a rural community are often greater than those of an urban community, and the economic needs less than the country. The Province or even to the nation. If these young people can find congenial city occupations or vocations in some town or city near home they remain there, learn to know the town and enlarge the purchasing capacity of such centre as far as the foodstuffs produced by the neighboring farmers are concerned. This places the purchasing power and economic growth greatly increased, as in the several communities of the West lake to which families and the cultivation of other products than the primary grain.

Settlers For Prairie Lands
There is a law of science in which the urban centre, the town, and trading benefits spread over the territory concomitant to it for miles around. The town or city develops the model of the road and school, especially for the town, and the town and urban centre gives better results relatively than a small clearly organized community. It is only in sparsely places that villages, universities, and cultural institutions are to be found, and culture spreads rapidly. For this reason the farmer's sons and wife could have no education beyond that received by the local pub school, but for the organization of humanity described above, the mother of all, Joy as a divine emanation, education, sculpture, architecture, etc. Higher education and fast centres of life. But for towns and cities there could have been little dissatisfaction with the country. There would be none or the modernly explored lands to which the farmer and his wife and children are glad to go for relief when sickness or other calamity occurs. Even religious institutions enter the picture, the church force which it acquires in the educational colleges and philanthropic organizations which are to be found only in our cities. If some of our manufacturers and business men are to have large fortunes, and that of these freely of their substance that colleges, universities, and hospitals may minister to the farming as well as the urban population.

It is evident, therefore, that the greater the number of towns and cities scattered about the prairies the better for those who till the soil. Villages do not grow into towns and cities. Allowing for the growth of manufacturing industries under the aegis of a fiscal policy which encourages their establishment and growth in the country. This is true for the Eastern as well as for the Western Provinces.

The Hardstone Brick Co. is continuing to add to its additional machinery so as to give the plant a daily capacity of 60,000 bricks. The factory will be operated by electricity. During 1912 the Dominion Steel and Coal Co. had 5,000 men on its pay roll, and the company has already engaged in excess of this, as 1,500 men will be employed in the new mine. The wage bill last year was nearly \$125,000.

The Lethbridge Canning Co. Ltd. has been granted at \$25,000 with nomination to increase the capital to \$100,000. It contemplates erecting a cannery and cold storage plant.

A warehouse is being erected in downtown, Alta., for the National Bag & Chemical Co.

YOU WANT GOOD PRINTING

HIGH-CLASS PRINTING can only be executed in offices where there is first-class machinery and the most modern type. The Review has recently installed an entirely new series of type, bringing the office equipment to a point where it can successfully compete with the larger establishments in other places. The Bow Island Review now has a plant that is a credit to the town in which it is established and it is no exaggeration to say that its equal cannot be found in no other town (of a similar size to ours) in Alberta.

McGraw-Hill Co., Publishers.

Union Sunday school is held in the Presbyterian church every Sunday at 11 a.m. Methodist church service at 7:30 p.m. Chas Bishop, pastor.

There will be service at All Saints' Church on Sunday evening at 5:30 p.m. Rev. Mr. Osamura will officiate.

The Habit of Reading Advertisements

NEWSPAPERS would be much less enjoyable, instructive and valuable than they are if they contained no advertisements. Many persons read the advertisements quite as thoroughly as they read the news matter. This is just as it should be.

* The more advertising, the more buying. The more buying, the greater the consumption of the goods or service advertised.

More business would be done by the merchants of Bow Island if they

advertised more, and if more of them advertised. Much business goes to the big city mail-order houses because they advertise. These houses would cease to draw business from this community if they ceased to advertise.

To the Merchants of Bow Island.

Advertise more, and more you advertise, and the big city mail-order houses will get less and less business from this community, and you will get more.
